PROFESSIONAL EXPERIENCE

Senior Member of Technical Staff, Salesforce, San Francisco

August 2022-Present

Member of Technical Staff, Salesforce, San Francisco

June 2021-July 2022

- Develop a machine learning prototyping and debugging platform for Salesforce's data scientists and engineers to explore end-customer data in a secure and compliant manner.
- Provide on-call support, resolve issues, research and design new features.
- Implement, test, deploy and review functionalities and develop applications adhering to design patterns.

Software Engineering Intern, Salesforce Research

June 2020-August 2020

- Implemented unified approval process for Training and Experimentation to provide a platform for common approval flow for all projects.

Software Engineer, Vassar Labs IT Solutions Private Limited, Hyderabad, India

June 2017-July 2019

- Led a team of 4 to implement a backend framework for uploading data of multiple projects across different partitions and sending it to mobile application through REST APIs.
- Designed a failsafe system for real time reception and storage of time-series JSON and media data from mobile application to be relayed to third parties after performing analytics which was 3X faster than the previous system.

Intern, Canon Inc., Kawasaki, Japan

May 2016-November 2016

- Developed a standalone application to assist image processing-based IP verification process, thus eliminating manual process of difference visualization amongst Golden model and IP generated images.

EDUCATION

- **University of Southern California, Los Angeles**
Master of Science, Computer Science (August 2019-May 2021) **GPA-3.85/4.00**
Coursework – Analysis of Algorithms, Artificial Intelligence, Database Systems, Web Technologies, Machine Learning, Information Retrieval through Web, Applied Machine Learning for Games
- **Indian Institute of Information Technology Design and Manufacturing Jabalpur, India**
Bachelor of Technology, Computer Science and Engineering (August 2013-May 2017) **GPA- 9.1/10.0**

TECHNICAL SKILLS

- Programming Languages: JAVA, C
- Frameworks: Spring, Maven, Kafka, Flask, Android, OpenCV, PyQt, AWS S3, Play Framework, Redis, Mockito, Jenkins, Liquibase
- Scripting Languages: Python, PHP
- Databases: Cassandra, MySQL, PostgreSQL
- Web Technologies: React, Node.js, HTML, CSS, JavaScript, Bootstrap, JSON, TypeScript
- Kubernetes, Istio, Web scraping (Jsoup), REST APIs, Amazon Web Services, Docker, Google Cloud Platform

ACADEMIC PROJECTS

- **News aggregation website with search suggestions, bookmarking and comments** **March 2020-April 2020**
Created and deployed a responsive website on Google Cloud platform having latest news articles from Guardian and NY Times API, which can be shared, bookmarked and commented upon by users using React and Node.js.
- **Android news app for weather, search, news articles and bookmarking** **April 2020-May 2020**

An android application with location permissions for displaying weather data along with news articles from Guardian API. There is also an auto suggest functionality for search, bookmarking and the user can pictorially illustrate trends of a keyword through Android MP chart library.

- **NewsApp website for getting news from Google News API** **February 2020-March 2020**
A news website which dynamically gets data from Flask backend, and uses DOM manipulation to create carousal, news articles, word cloud as well as performs article search depending on multiple dimensions.
- **Chinese Checkers (Halma) playing agent– Artificial Intelligence** **September 2019-October 2019**
Built an AI agent to play and win Chinese checkers in minimum number of moves by anticipating decision trees till depth 4 using minimax with alpha beta pruning using Java.
- **First Order Logic Inference System- Artificial Intelligence** **October 2019 -November 2019**
Developed a first order logic inference system in Java for parsing and infering first order logic semantics using resolution including parsing, processing and unification.
- **Spoken Language Classifier through Neural Network** **December 2016-May 2017**
